

AI CLASSROOM ASSIGNMENT NORMS TOOL

INTRODUCTION

Generative AI is a type of artificial intelligence that allows individuals to create a variety of text, images, audio, or video using technology. Generative AI, like any other aspect of computing, may be one of the tools you decide to use in your toolbox, with your ultimate goal with any assignment being to learn and comprehend the content rather than focusing on getting the right answer.

The Kapur Foundation recommends districts, schools, and classrooms first examine and deeply interrogate if, how, and why they may wish to include, or not include, generative AI in their schools. If your district/school is implementing AI usage for students, we encourage the use of this Kapur Foundation AI Norms for Classroom Assignments Tool to develop AI literacy, increase classroom conversations around AI ethics, and create conditions for critical thinking by students using generative AI. The Kapur Foundation AI Classroom Assignment Norms tool allows teachers and students to co-create policies in their classrooms for using generative AI Tools on assignments and activities.

This tool is meant to help classroom teachers facilitate discussion and decisions about the amount, if any, of generative AI is allowed to be used on each assignment while still also allowing agency for students to select the generative AI they want to use. Each generative AI assistant role is both defined and assigned a point value, weighted according to the amount of assistance the generative AI tool provides a user. (ex: Co-Author is weighted 5 points [AI doing more of the work] compared to Bibliography Builder being worth only 1 point).

Finally, accompanying this tool is a **documentation questions form** to help teachers facilitate classroom discussion around student usage of generative AI on assignments. The documentation questions form helps support classroom discussion around ethical implications of generative AI, provide students an opportunity to track and share feedback on their generative AI usage, as well as share any additional learning or discoveries in their usage of generative AI on assignments. Both the norms tool and documentation questions form can be modified to better meet the teacher's and students' needs.

Generative AI Assistant Roles	Definition of Generative AI Assistant Roles	Sample Prompts for AI	Example Generative AI Tools	Point Value of AI Assistance
Bibliography Builder	Using generative AI to create accurate bibliography in APA or MLA format for assignment completion	"provide the MLA format of x source"	MyBib, Citation Machine, Zotero, EndNote, Cite this for me, CiteMaker	1 point
Brainstormer	Using generative AI to create and generate ideas or starting prompts needed for assignment	"provide a list of 10 facts about the Pythagorean Theorem"	Grammarly, Chat GPT Gemini, Claude, Zapier, Duet AI, Rytr, Jasper, Writesonic	2 points
Clarifier	Using generative AI to edit in order to refine the meaning of paragraph within assignment	"provide an edited paragraph that is more concise and clear on writing level of a 9th grader"	Grammarly, Chat GPT Gemini, Claude, Zapier, Rytr, Duet AI, GitHub Copilot, Jasper, Writesonic	2 points
Co-Author	Using generative AI to co-write entire assignment including development of ideas, context of writing, refinement of writing, as well as assistance with outline and structure of document to assist with assignment completion	"provide a 5 paragraph essay written on a 10th grade writing level with five unique citations about the emperor of Japan during WWII"	Grammarly, Chat GPT Gemini, Claude, Zapier, Rytr, Duet AI, GitHub Copilot, Jasper, Writesonic	5 points
Data Analysis	Using generative AI to assist in understanding and analyzing a variety of data or data sets needed for assignment completion	"provide a pivot table that will cross reference and show trends gender data with socioeconomic data for suburb of Suwanee in Georgia over the last 5 years"	Tableau, Bardeen.ai, Qlik, Polymer, PowerBI, AnswerRocket	5 points

Generative AI Assistant Roles	Definition of Generative AI Assistant Roles	Sample Prompts for AI	Example Generative AI Tools	Point Value of AI Assistance
Data Illustrator	Using generative AI to create specific graphs, timelines, and/or charts needed for assignment completion	"provide a chart to compare examples of active and passive voice in English"	Piktochart, Outline Ninja, Mostly AI, Taskade, Infogram	2 points
Editor	Using generative AI for spelling corrections and grammar suggestions to assist with assignment completion	"provide grammar and spelling edits to this paragraph"	Grammarly, ProWritingAid, Linguix, Wordtune, LanguageTool, Hemingway App	2 points
Idea Illustrator	Using generative AI to create images, infographics, graphic organizers, or other visual representations of concepts for assignment completion	"provide an image of Denmark Vessey would have looked like as a child"	Adobe Firefly, Midjourney, DALL-E2, Stable Diffusion, Piktochart, Canva, Craiyon, ImagineArt	2 points
Outline Builder	Using generative AI to create a hierarchy and/or roadmap for your assignment	"provide a outline or template for writing a three page paper on Maya Angelou"	Grammarly, Akkio, Copy.ai, Hypotenuse AI, Reliabesoft	3 points
Research Assistant	Using generative AI to find credible sources that are verified to assist with assignment completion	"provide a primary source related to Dolores Huerta"	Chat GPT Gemini, Claude, Duet AI, GitHub Copilot	2 points
Translanguaging Support	Using generative AI for language translation of text, as a thesaurus, or to break complex text down as needed for improved comprehension	"provide a translation of this primary document in Portuguese to English"	Myreader's AI, Chat GPT, Gemini, Claude	1 point
